

OUR ACTIVITY AREAS:

Our company has made projects with an appropriate solution and cost-effective approach in many areas, including water treatment construction, factory constructions, large warehouse constructions, concrete rigging, steel construction, concrete prefabricated constructions, telecommunication, housing and renovation works. We continue our activities in a wide range, collecting together suitable designs.

RENOVATION SOLUTIONS

If you need repairs or urgent renovation of your premises, we are at your service. We carry out our activities in all types of structures, including repair work in industrial facilities, hotels, shops, offices, residential buildings as a whole, or in certain parts of residential buildings (bathrooms, kitchens and etc.).

TURNKEY PROJECTS

Many projects approved by customers have been implemented together with our experienced staff and technical team, both large projects and cosmetic construction works, with the highest priority on quality in the supply of materials and their application.

STEEL CONSTRUCTION

In the field of steel construction, we produce solutions with our expert staff and technical teams in steel structures, warehouse and factory construction, all kinds of large and small steel systems, and steel structures.

WATER STRUCTURES

Together with our expert staff and technical team in water structures such as waste water treatment, drinking water treatment, water tank, swimming pool, etc., we are assertive, faithful and determined to overcome all works in sealing in all kinds of water structures.

OUR PROJECTS:

Our company, with its 30 years of experience, is taking solid steps towards becoming a leader in construction projects. Our company provides services in areas such as engineering, production, installation and renovation, industrial facilities and residential complexes.
